There is competition in today's utility market to provide the best customer service and reliability to its customers. Hiscall can provide solutions to enhance communication needs, resulting in a better experience. Solutions our Utility customers are implementing now include:

- **Audio/Visual Equipment** in conference/community rooms
- **Digital Signage** enriching the member experience in lobby areas
- **Wireless Connections** replacing outdated microwave connections
- **CCTV / Security Cameras** preventing material theft
- **Access Control Systems** securing areas with limited access
- **Wide Area and Local Area Networking** supporting new capabilities
- **Voice & Data Cabling** structured networks installed by certified technicians
- **Cloud / UC Solutions** delivering seamless communications
- **Disaster Recovery** ensures communications do not go down in emergencies
- **Telephony Features such as Call Reporting, Agent Evaluation, Call Recording and Speech Recognition IVR Technology** enhance and automate your customer service

Hiscall is a leader in communication products and design services for the Utilities market. It is a true partnership from site survey through completion, ensuring the project is on time, on budget and meets all specific requirements.
